MODERN  
AND SAFE

PLAYGROUND  
FOR YOUR  
CHILDREN

## Why to choose SAPEKOR products?

We are young company with a dynamic growth which is focused on the manufacturing of complete assortment for the children playgrounds. Our offer includes stainless steel playgrounds, stainless steel street furniture and safety rubber flooring – especially rubber tiles.

## Personal approach and technical support

We treat all our clients with the utmost professionalism and strive to meet all their requirements. Of course there is the personal approach, technical support and propose the best possible solutions, we are able to add a graphic visualization based on client request.

## Production and used materials

We use only high quality materials and the entire process is subjected to thorough scrutiny. Our goal is to give children the opportunity to play for many years onto safe playgrounds, which has a positive effect on the development of their physical skills and it is important for their proper mental and social development.

Our playground equipment are made only from a combination of stainless steel and high quality HDPE plates which are processed by our own CNC router.

We offer rubber tiles in two different shapes. You can choose rubber plates in square shape or in the puzzle shape in different colors and thicknesses. We produce rubber tiles from SBR granules or in combination SBR and EPDM granules. We can offer you an ideal solution based on the area of application.

As a manufacturer we fully aware of its responsibility, first and foremost we care about the safety of children, who are our main inspiration.
